Analytics & Technical Skills

Programming & Analytics: Python, SQL, C/C++, JavaScript, Pandas, NumPy, Exploratory Data Analysis

Product Analytics: Statistical Analysis, KPI Tracking, Data Visualization, Predictive Analytics, Product Metrics, Scikit-learn

Databases & BI: MySQL, MongoDB, Supabase, Power BI, Plotly, Matplotlib

Tools & Technologies: REST APIs, JSON, Git, GitHub, n8n, LangChain, RAG, AI Agents

Experience

Labcorp

Remote

Machine Learning Engineer Intern

2025

- Analyzed clinical and operational datasets to identify trends, improving prediction accuracy by 20% through feature engineering and statistical analysis.
- Automated reporting and model evaluation workflows using Python, reducing analysis time by 35%.
- Delivered data-driven insights by collaborating with cross-functional teams to support business decisions.

Planto.ai

Remote

AI Research Intern

2024

- Analyzed AI product performance and user metrics, reducing computational overhead by 25%.
- Prepared analytical reports and dashboards to communicate insights with engineering teams.
- Performed predictive analytics and statistical modeling, improving forecasting accuracy by 30%.

Projects

TrackD AI: Product Performance Dashboard | *Next.js, Supabase, n8n, APIs*

2025

- Built a product analytics dashboard tracking productivity, GitHub activity, workload trends, and deadline-risk KPIs to support data-driven decisions.
- Integrated APIs with automated n8n pipelines and Supabase to transform multi-source activity data into actionable insights and workflow recommendations
- Designed interactive dashboards enabling visualization of user metrics, productivity trends, and performance analytics
- Project Link:** github.com/GOWRI296 (TrackD AI)

ASTRA-RAG: AI Knowledge Assistant | *Python, Pinecone, OpenAI API*

2024

- Built a retrieval-augmented AI assistant integrating APIs and vector databases to deliver context-aware technical responses
- Analyzed retrieval quality and optimized Pinecone search, improving relevance ranking and reducing response ambiguity by 45%
- Evaluated retrieval performance using query analysis and iterative experimentation to improve user experience
- Project Link:** github.com/GOWRI296/ASTRA-RAG-personal-code-bot

Full-Stack E-Commerce Platform | *React.js, Node.js, Express.js, MongoDB*

2024

- Developed a full-stack e-commerce platform featuring product catalog, shopping cart, user authentication, and secure order management
- Designed responsive dashboards to manage products, inventory, and customer orders while improving user experience and usability
- Integrated REST APIs and MongoDB to manage product, customer, and transaction data while supporting data-driven business operations.
- Project Link:** github.com/GOWRI296 (E-Commerce Platform)

Education

Vellore Institute of Technology

Bhopal, Madhya Pradesh

B.Tech in Computer Science and Engineering (AI & ML)

2023-2027

- Relevant Coursework: Data Structures, Database Management Systems, Statistics, Data Science, Business Analytics, Artificial Intelligence

Achievements

MERN AI Hackathon | *Runner-up*

2024

- Runner-up out of 90+ participants; built a full-stack MERN-based AI application with intelligent recommendations

Accenture Hackathon | *Runner-up*

2024

- Runner-up out of 50+ teams; improved solution efficiency by 40% with optimized, scalable cloud deployment
