Summary

Product Analyst with hands-on experience translating product and business data into actionable insights using SQL, Python, and BI dashboards. Skilled in KPI tracking, funnel and cohort analysis, A/B testing, user segmentation, and stakeholder reporting, with a track record of improving decision accuracy, cutting reporting turnaround, and driving product strategy across analytics and ML internships.

Technical Skills

Query & Programming: SQL, Python, C/C++, JavaScript
Product Analytics: Funnel Analysis, Cohort Analysis, A/B Testing, User Segmentation, Retention Analysis, KPI Tracking & Trend Reporting, Root Cause Analysis, Hypothesis Testing
BI & Visualization: Power BI, Plotly, Matplotlib, Excel-based Reporting, Pandas, NumPy
Databases: MySQL, MongoDB, Supabase
Automation & Tools: n8n, REST APIs, Git, GitHub, JSON, Scikit-learn

Experience

- Labcorp — Machine Learning Engineer Intern** *Remote, 2025*
- Analyzed 50K+ clinical and operational records using SQL and Python to surface user and process trends, improving product decision accuracy by 20%.
 - Automated ETL pipelines and reporting workflows, cutting manual reporting effort by 35% and standardizing data delivery across teams.
 - Designed and shipped KPI dashboards for 5+ cross-functional stakeholders, accelerating product performance reviews and prioritization.
 - Led root-cause analysis on data discrepancies across 10+ reporting cycles, resolving 90% of recurring errors and raising validation accuracy by 15%.
- Planto.ai — AI Research Intern** *Remote, 2024*
- Evaluated product performance metrics and experimentation results, lifting forecasting accuracy by 30% through structured A/B testing.
 - Identified optimization opportunities via behavioral and performance analysis, reducing processing overhead by 25%.
 - Built 5+ interactive dashboards tracking product KPIs, cutting stakeholder reporting turnaround by 20%.
 - Authored 15+ technical reports communicating analytical findings to non-technical audiences, reducing onboarding time by 30%.

Projects

- TrackD — Product Analytics & Workflow Intelligence Platform** *2025*
- Engineered automated pipelines integrating 3+ data sources (REST APIs, n8n, Supabase), reducing manual data prep time by 70%.
 - Delivered interactive dashboards monitoring productivity, engagement, and workflow KPIs to support product decision-making.
- ASTRA-RAG — Product Search Analytics Assistant** *2024*
- Improved retrieval relevance by 45% through iterative experimentation and evaluation-metric design.
 - Validated search quality against structured KPIs, improving response accuracy and reducing ambiguity for end users.
- Custom GPT-2 Data Pipeline** *2024*
- Processed and benchmarked 50M+ tokens of text data, reducing model perplexity by 35% through fine-tuning and statistical validation.
 - Designed a 12-layer model pipeline with performance testing to ensure output reliability.

Education

- Vellore Institute of Technology Bhopal**, Madhya Pradesh *2023–2027*
- B.Tech in Computer Science and Engineering (AI & ML)
- Completed coursework across 5+ advanced areas including Data Structures, DBMS, Statistics, and Machine Learning; led hands-on projects in predictive modeling and product analytics.

Achievements

- Accenture Hackathon — Runner-up (2024):** Improved solution efficiency by 40% among 50+ competing teams through data-driven optimization.
- MERN AI Hackathon — Runner-up (2024):** Secured Runner-up among 90+ participants by building a full-stack, data-driven application with intelligent recommendation features.
